REASONS FOR ALLOWANCE

1. Claims 1-16 are allowed.
2. The following is an examiner's statement of reasons for allowance for claim 1: the prior art fails to teach or suggest *identifying onset of planarization* based upon a decrease in a value over time being monitored through the second derivative, the decrease occurring after an increase in the value. The closest prior art, Sun, discloses a decrease in a value over time being monitored through the second derivative (T4 to T5 in Figure 8D), the decrease occurring after an increase in the value (T2 to T4 in Figure 8D) (column 9, lines 27-43). Sun's transition is associated with the breakthrough of metal layer (54) (column 7, lines 46-48; column 9, lines 36-43), rather than planarization. However, there is no motivation or suggestion of identifying onset of planarization based upon a decrease in a value over time being monitored through the second derivative, the decrease occurring after an increase in the value, as in the context of claim 1.
3. The following is an examiner's statement of reasons for allowance for claim 10: the prior art fails to teach or suggest triggering a transition point when the rate of change crosses the threshold decrease associated with the rate of change and after a period of time in which the rate of change increases, the transition point indicating an onset of planarization, as discussed above.
4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

5. In view of Applicants' Amendments to the Claims (i.e., voltage signal), filed Jan. 20, 2006, the objection to claims 2, 4, 5, and 12 has been withdrawn.

6. In view of Applicants' Amendments to the Claims (i.e., computer implemented method), filed Jan. 20, 2006, the rejection of claims 1-9 under 35 U.S.C. 101 has been withdrawn.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric B. Chen whose telephone number is (571) 272-2947. The examiner can normally be reached on Monday through Friday, 8AM to 4:30PM.
